Mr. and Mrs. Labrue left Tuesday night for their new home at Galveston, Texas, and while the GAZETTE dislikes very much to see good citizens like them leave sunny Kansas yet it will rejoice with them if they can make a living easier some other place.

The December number of the Delineator is called the Christmas number, and is filled with holiday good things. The exposition of winter styles is complete, and the season's millinery is attractively presented. There is a special holiday article on Novel home made Christmas gifts, a theme pleasantly supplemented by a chatty glaze at current novelties in around the Tea-Table. Mrs. Roger A. Pryor delightfully chapters her readers to Society Breakfast, Luncheons and Suppers, while the Christmas Turkey itself figures in an amusing sketch of Cabin Life in the South, by Lucia M. Robbins. Henry C. Wood tells how some bright young people of the Blue Grass Region celebrated Christmas at "Happy Valley," and a helpful article on Carving completes the tribute to the day. Floral Work for the month, a look into the Newest Books and a review of novelties in Knitting, Tatting and Lace Making are among the other features.

A NEW STAR FOR OLD GLORY.

Utah's Constitution has been framed; her people will adopt it in November, and soon thereafter the President will issue his proclamation, and the great Territory—the history of which so well illustrates the potency of patience, persistence and faith, and within which was first raised on the Western Slope the standard of civilization—will be admitted to all of the privileges of a sovereign state.

It will be a happy day for Utah—a happy day for the nation—the day Utah shakes from her supple limbs the trammels of territorial life, and with her dowry of wealth and brains is received into the family of states. Then public interest will center in the new sovereignty, and the people will look to it for an answer to the question, "What have you within your borders for the making

of a great commonwealth?" How little should Utah be ashamed by this inquiry?

No western state ever entered the Union after a longer period of preparation or with a more splendid men and resources. Utah has 250,000 people trained and disciplined to the tasks of industry.

Utah has a chain of fertile valleys extending from Idaho to Arizona under a system of irrigation as perfect as any in the world—valleys rimmed by treasure filled mountains, and checkered with little farms, whereon, in many instances for nearly half a century, has been exemplified in the perfection of husbandry.

Utah has mines—other states have too—but Utah has mines—mines, the mere mention of the names of which compels the attention of the whole mining world. Take for instance, "The Ontario," it has paid \$13,175,000 in dividends, of the "Horn Silver," dividends, \$5,147,500, or the "Daily," dividends, \$2,850,000, or several others that are not two over the million mark. These above mentioned, are silver properties, but there are others bearing gold—bright, glittering gold—in liberal quantities. In one gold mine alone, the Mercury, dividends are being paid on the basis of half a million a year, while in the Mercury District, infinitesimal in comparison with other mining districts, there is a cluster of pure gold bearing properties that aggregate in value many millions of dollars. In the light of these figures, is it unreasonable to assert that Utah is one of the greatest mining regions in the United States? Where else can you find so many precious metals, so many minerals of use in the arts and in commerce, and in such great bulk?

There is even gold in the water of the Great Salt Lake and health in the air that goes with it—but that is not all. Here is a field for the business man that new and fruitful. Almost every conceivable resource in the shape of raw material is within the reach of the manufacturer. If this is an age of progress as has been asserted, then Utah affords the opportunity to expand and increase the trade of the world—that is what is needed.

Utah has pastoral resources of unlimited possibilities. It simply needs the people to demonstrate it. No more overflooded, boneless, golden grain field or heavier laden vines and fruit trees gladden the heart and pocket of sun-browned husbandman than the hundred fold harvests of this fair land. No greener pastures ever festen a herd of thriving cattle and no soil has proved more inexhaustible than this. Water in abundance just when and where needed and fresh and pure from its mountain sources.

If all of these possessions are factors in the growth of a great state, then the new state of Utah may face the future without a tremor.
